---

Solar cell panel characteristics test; Solar controller function test; Solar off-grid inverter function test; Comprehensive experiment of solar energy application.

The DLXNY-ST03 Portable solar power generation test box is a solar photovoltaic power supply system, which can provide a practical teaching, testing, demonstration platform for work principle of solar ...

Set with cell test indicator, storage cell capacity testing indicator, storage cell is with indicator, can test to various parts.

It is convenient for students to conduct various tests related to solar energy. The product consists of a training model and a test box, modular design, and an simulation light source. Experiments can also ...

Complete Experiment Kit: Comes with all necessary components for a comprehensive solar energy experiment, including solar panel, wind blade, connecting cables, and base.

It consists of solar panels, batteries, solar controllers, inverters, loads, etc. It has a modular structure design, and the electrical test points are all connected to the experimental wires with safe ...

Specifically satisfy solar cell performance test and photovoltaic application teaching requirements of new energy professional at the higher education and vocational education.

Portable Solar Power Generation Training Box The DLXNY-ST03 portable solar power generation training box is made up of a case that contains a photovoltaic power supply device, solar power ...
