This research aims to evaluate the feasibility of operating an off-grid solar-powered air-conditioning bed unit using low-GWP refrigerants that can efficiently replace conventional refrigerants.

The improvement in the efficiency of air conditioning and ventilation systems, as well as improving the protection of buildings against solar radiation and improving thermal ...

The review shows there are currently at least 58 locations on the territory of Slovenia where it is possible to set up utility-scale solar power plants with a capacity higher than 10 MW, and ...

The improvement in the efficiency of air conditioning and ventilation systems, as well as improving the protection of buildings against solar radiation and improving thermal insulation of older ...

In the first call, the Slovenian authorities are accepting applications for simple PV systems without storage, as well as installations combined with batteries. They will grant a maximum rebate...

Over the last decade, the Republic of Slovenia has been at the bottom of the EU Member States in terms of increasing the share of renewable energy consumption. Fortunately, the EU legal ...

Summary: Explore how solar-powered air conditioning plants in Slovenia combine renewable energy with smart cooling solutions. Discover industry trends, cost-saving benefits, and real ...

Summary: Explore how solar-powered air conditioning plants in Slovenia combine renewable energy with smart cooling solutions. Discover industry trends, cost-saving benefits, and real ...

Summary: Explore how solar-powered air conditioning plants in Slovenia combine renewable energy with smart cooling solutions. Discover industry trends, cost-saving benefits, and real-world ...

Solar air conditioning is possible in Slovenia

Our expert team has years of experience designing and building large-scale solar systems that generate clean energy and protect the environment. We understand the unique challenges of solar farm ...
