India exported solar panels and solar cells worth \$267.6 million (INR23.1 billion) in Q1 2025, compared to \$212.2 million in Q4 2024. This represents a healthy 26% growth, largely fueled by ...

Texas installed the most solar capacity in the first half of 2025 (3.8 GW dc), followed by California, Indiana, and Arizona. In Q2 2025, the residential segment installed 1,064 MW dc of solar ...

The 8.6 GW of new solar module manufacturing capacity added in Q1 2025 marks the third-largest quarter for new manufacturing capacity on record, according to the U.S. Solar Market ...

US solar manufacturing ramped up sharply in the first quarter of 2025, supporting record levels of new capacity as solar and storage made up 82% of additions to the grid.

With this edition of the quarterly briefing, we've included sections on import and export trade dynamics and manufacturer's financial conditions. This research will help clients understand ...

o The resulting revenue uncertainty--which may slow PV growth after 2025 --will be greater for small-scale solar than for utility -scale solar, because small-scale projects had benefited ...

In 2025, China's solar industry navigated a complex global landscape, demonstrating remarkable resilience as module exports continued to climb despite widespread concerns over ...

Solar exports in the quarter were dominated by photovoltaic modules, which accounted for 98.7% of the total shipments, while solar cells made up the remaining 1.3%. The U.S. was the ...

China Chamber of Commerce for Import and Export of Machinery and Electronic Products (CCCME) released its analysis of China's photovoltaic (PV) product foreign trade in the first ...

Solar module exports in the first quarter of 2025

Subsidized mass production of Chinese solar panels drove down the global price and drove nearly all of the first generation of U.S. and European solar panel makers out of business.
