Solar Turbines is a global leader in energy solutions helping businesses, governments and public institutions turn natural gas into sustainable, cost-effective power.

Energy from the sun The sun has produced energy for billions of years and is the ultimate source for all of the energy sources and fuels that we use. People have used the sun's rays ...

Solar builds complete gas compressor packages that are ready to go to work in all gas compression and transmission applications, no matter where the job is. Solar designs and manufactures every ...

If your Solar gas turbine has an older control or relay system, upgrade to the latest Turbotronic programmable logic controller (PLC)-based technology via Solar's controls retrofit program. Protect ...

Learn how solar turbines convert concentrated solar heat into mechanical energy, providing reliable, dispatchable power unlike standard PV.

Solar turbines, as opposed to conventional photovoltaic panels, utilize concentrated solar power (CSP) to power turbine systems, offering a ...

Join the Solar Turbines family and find your career within a multi-talented team with decades of experience. We offer strong benefits package and growth opportunities.

As renewable energy demand increases, Solar Turbines serves as an experienced sustainability partner helping our customers build strategies around renewable energy.

Solar turbines are defined as systems that generate steam using a transmission fluid heated by sunlight captured through parabolic mirrors, converting thermal energy into rotary motion ...

Solar Turbines" Customer Secured Applications and Portals include the Solar Turbines Parts Store, InSight

Solar cells are typically made from a material called silicon, which generates electricity through a process known as the photovoltaic effect. Solar ...

Siemens Energy steam turbines are the most often used power generation product in solar thermal power plants. Our tailored steam turbines are reliably operating in all common concentrated solar ...

Solar Turbines designs and manufactures quality gas turbines and packages that work around the world. For both Oil and Gas and Power Generation industries, Solar offers energy solutions that power all ...

Solar turbines are a renewable and sustainable energy source, as they rely on the sun's energy to power the turbine. Solar turbines can be used for a variety of applications, including power ...

A solar turbine, more commonly referred to as a solar-powered turbine or a solar thermal turbine, is a type of turbine that generates electricity by harnessing the ...

When the sun shines onto a solar panel, energy from the sunlight is absorbed by the PV cells in the panel. This energy creates electrical charges that move in response to an internal electrical field in ...
