-----

What sets the Soleolico wind turbine apart is not just its ability to generate wind energy, but its integration of solar panels into the turbine blades. ...

The Swiss startup has patented a unique system that allows to reuse wind turbines as a support for double-sided solar panel systems

With over 300,000 wind turbines installed worldwide, Swiss startup Turn2Sun uses recycled wind turbine blades as horizontal supports for solar panels instead of metal beams.

A Swiss startup is using reclaimed wind turbine blades instead of metal beams as horizontal supports for solar panels. Founded in 2022, Turn2Sun is based in Neuchâtel and calls its ...

What sets the Soleolico wind turbine apart is not just its ability to generate wind energy, but its integration of solar panels into the turbine blades. This dual-capacity generation system ...

The French startup Turn2Sun has just launched the world premiere of "Blade2Sun(TM)", a solution that allows installing solar panels on the reused blades of wind turbines, which aroused the ...

Use of solar panel as wind turbine blades. With populations increasing exponentially and our natural resources being strained by increases in demand, it is more important than ever to invest in ...

In an age of finding creative ways to recycle end-of-life products, a Swiss startup is using retired wind turbine blades as solar panel support beams.

Wind turbine blades have a reasonable surface area and extra power from solar panels mounted on them could easily be transmitted to the grid via existing wind farm infrastructure. But even so, the ...
