-----

President Trump just signed a bill into law that cuts the 30% residential solar tax credit in 2026--nearly a decade ahead of schedule. For homeowners considering solar, act now to lock in ...

The U.S. Department of Agriculture has awarded billions in Rural Energy for America Program (REAP) grants for solar projects. Secretary Brook Rollins said the agency will no longer ...

Here's the truth: solar energy is the most cost-effective form of new electricity generation in the United States, even without subsidies. It's fast to deploy, requires no fuel, and delivers ...

Among its provisions, the law accelerates the phase-out of tax credits for new wind and solar projects and eliminates long-term subsidies for renewable developers on public land. The law...

"We are no longer allowing businesses to use your taxpayer dollars to fund solar projects on prime American farmland, and we will no longer allow solar panels manufactured by foreign ...

As we consider the critical reforms in the reconciliation process, I rise today to make the case for why we must eliminate the generous federal subsidies for wind and solar energy, paid for by ...

The federal solar tax credit for homeowner-owned systems is no longer available. If you're reading this after 2025, use this article to understand how the credit changed--and evaluate ...

Not only does solar power receive tax subsidies, but it has also garnered sizable federal loans, particularly during the Obama-Biden administration. Solar plants are touted to operate for ...

Agriculture Secretary Brooke Rollins said Monday that the department would be cutting off subsidies for solar power projects on U.S. farmland, asserting that they are making it harder for ...

# Solar power generation is no longer subsidized

Congressional Republicans passed the One Big, Beautiful Bill, which put the brakes on federal clean energy subsidies by terminating investment and production tax credits for wind and solar...
