-----

Southern Power currently owns more than 3,050 megawatts of solar generating capacity at 30 facilities operating or under development in California, Georgia, Nevada, New Mexico, North Carolina, Texas ...

Interactive U.S. Solar Farms & Solar Parks Map showing plant boundaries, owners, nameplate capacity (MW), and power output. Based on EIA-860/860M/923. Filter by utility-scale photovoltaic and CSP ...

See the locations of the major solar systems identified by this research on our interactive map.

To provide a normalized comparison among hundreds of different utilities in the Southeast, SACE has ranked utilities on the basis of solar watts per customer (W/C). This illustrates the amount of solar ...

We believe that the expansion of solar energy is inevitable, but we're pushing utilities, lawmakers, and state utility commissions to accelerate solar deployment so that Southerners can ...

Browse our directory of all the power plants across South Carolina. View monthly power plant generation and fuel consumption, power plant locations, power plant operators, and more.

The South Carolina Solar Installations Map displays the installed solar photovoltaic capacity and the total number of installations in the state by county.

In this article, we'll explore how solar power is faring in the southern United States, the challenges and opportunities it faces, and the future outlook for solar energy in the region.

Solar power plants are the quickest and most economical way to get more kilowatts flowing into energy-thirsty communities in the US, as capably demonstrated by a new 100-megawatt ...

Here is a map of all utility-scale solar farms in South Carolina. Hover over a solar farm to view information on each project like their name, capacity and construction date.
