What is the highest wage category in the energy industry?

The highest wage category in the energy industry is in electricity generation and power plant operations. Regardless of the energy source, the pay is similar between fossil fuels and renewables, with solar electricity generation edging out the others. Join tens of thousands of others who are concerned about climate change.

Are solar and wind jobs better than fossil fuels?

Jobs in the solar and wind sector pay slightly less on average than those in fossil fuels but offer better job security. Jobs in renewables - more job security, slightly lower wages? (Photo credit: Dave Worth CC BY-NC-SA 2.0) [Leer en español]

Will wind & solar jobs grow in 2029?

The growth of wind and solar employment is projected to be somewhere between brisk and explosive, depending on which public policy path the U.S. pursues. The Bureau of Labor Statistics is projecting 50% growth for solar photovoltaic installers and 60% increase for wind energy technicians by 2029.

Is the solar jobs census bullish?

The Solar Jobs Census is far more bullish, forecasting 150% expansion in the solar workforce over the same time span with current energy policies, and 300% growth if President Biden's goal of 100% clean electricity by 2030 is enacted into law.

The salary at a solar bracket factory varies based on several factors such as location, experience, job role, and the specific company. 1. Salaries range from \$30,000 to \$80,000 annually, ...
