Spain's electricity market is dominated by 3 main suppliers: Grupo Endesa, Iberdrola & Gas Natural Fenosa. Combined the 3 electricity suppliers account for an estimated 50% of the Spanish electricity ...

We provide you with an overview of the main figures and statistical ratios related to the functioning of the electricity system in 2024, as well as its evolution over the last few years.

Daily breakdown of the production and consumption of electricity in the Spanish peninsular system (forecast for current day and close of previous days). It also includes graphs and charts with data ...

At an event in Madrid on Friday, the Spanish government presented the general outlines of its proposed Electricity Transmission Grid Planning strategy to 2030. Earlier in the week, capacity ...

Unlike other energy commodities such as coal, oil and natural gas, electricity trade between countries is relatively limited as it is more technically complex and requires a direct cross-border interconnection.

Overview  
Mode of production  
Electricity per person and by power source  
Renewable energy in Spain  
According to IEA the electricity use (gross production + imports - exports - transmission/distribution losses) in Spain was in 2004 253 TWh, (2007) 282 TWh and (2008) 288 TWh, while the use was in 2008 in France 494 TWh and Germany 587 TWh. Electricity production from natural gas in 2008 was in Spain 122 TWh, exceeded in Europe only by Russia 495 TWh, United Kingdom 177 TWh and Italy 173 TWh. By 2025, Spain had 6.3 GW hydropow...

Discover data on Electricity: Supply, Transformation and Consumption in Spain. Explore expert forecasts and historical data on economic indicators across 195+ countries.

Focusing on the most consequential recent developments in the electricity, oil, natural gas and renewable energy sectors, the review covers (among many other things) the major licensing ...

## Spain electricity distribution

In 2009, Spain exported about 3% of the electricity it produced. The volume of renewable electricity produced in 2009 was 5% greater than in 2004, and accounted for about 26% of the electricity ...

With a population of some 48 million inhabitants, Spain is one of the largest electricity consumers in the European Union. As of April 2025, it also had some of the lowest electricity prices...

The Spanish electricity market is a structure composed of multiple markets where electricity generators sell energy to retail companies, which in turn supply it to final customers. The ...
