The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand ...

We explore the current landscape of renewable energy in Spain, highlighting key projects, policy drivers, investment opportunities, and the outlook for the future.

The Spanish government approved Royal Decree 7/2025 on June 24, resolving several long-standing obstacles hindering the secure and lawful deployment of energy storage projects.

The European Commission has approved a significant EUR700 million (approximately \$763 million) aid scheme to propel the deployment of large-scale energy storage across Spain, marking a ...

Spain's Instituto para la Diversificación y Ahorro de la Energía (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

To achieve these goals, the new energy strategy outlines plans for a total power sector installed capacity of 214 GW by 2030, of which 160 GW will come from renewable energy generation facilities and 22 ...

By 2030, Spain expects to install 22.5 GW of energy storage projects, including included battery energy storage, pumped hydropower and solar thermal plants. The plan also aims for 76 GW ...

Energy storage has become a key piece of the electrical future in Spain, amidst the advance of renewable energies and the progressive withdrawal of nuclear generation.

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...

Spanish wind power project energy storage policy

In Spain, subsidies for storage will be granted through four calls under the PERTE ERHA1 scheme. The PERTE ERHA includes storage, renewables and hydrogen and it is funded by the European Union.
