Supply and installation (S& I) of patented SUN BALLAST ballasts in C32/40 concrete, with reference to concession no. 102017000107051, and to International Industrial Design certificate DM/086946, for ...

We manufacture several sizes and weights of products that are specifically designed for the strict quality requirements of the solar panel industry. High compressive strength and density combined with low ...

Our solar ballast blocks are poured to your specifications to prevent movement and overturning of solar panel systems. Our ballast blocks are available in a wide range of sizes, weights and mixes.

Precast concrete ballast footing used to securely position solar panels and related mounting hardware and help prevent movement and overturning of solar panel systems.

t block may be purchased from other suppliers but must meet the above specifications. Actual concrete block weights vary by location due to indigenous aggregates. It is the s

By keeping the pallet weight under 1,000 lbs, these blocks meet commercial roof load limits, reducing the risk of structural strain. This makes it easier for contractors to handle and position ...

The solar panel ballast block is an easy and durable way to add ballast to your engineered solar panel array. Each block measures 4x8x16, weighs in at approximately 32lbs, and meets both ASTM C90 ...

Solar ballast blocks are available in a range of weights and sizes to accommodate a variety of PV systems. Meets ASTM C1884 Standard Specification for Concrete Ballast Block.

A ballasted rack is a type of solar panel mounting system that uses weights such as concrete blocks or sandbags to secure the panels in place instead of penetrating the roof or ground ...

## Specifications for cement block weights for photovoltaic brackets

Our solar ballast blocks are poured to your specifications to prevent movement and overturning of solar panel systems. Our footings are available in a wide range of sizes, weights and mixes.
