-----

Around three tonnes of material - base stations, antennas, repeaters and other telecommunications equipment - will be transported to the mountains by the Swiss Air Force before ...

The research results provide scalable and efficient base station layout and configuration methods for continuous improvement of mobile network design, which can adapt to current and ...

Initiated in September 2014, the Telecommunications Surveillance Programme aims to update surveillance systems in Switzerland, including the Interception System Switzerland (ISS) and police information systems, to align with technological advancements. Parliament allocated CHF 99 million for the project, with CHF 71 million designated for the Post and Telecommunications Surveillance Service (PTSS). The total investment, including CHF 13 million from the Federal Department of Justice and Police

We developed the dialogue model as the basis for site evaluation so as to optimise planning of new base stations. This engages community authorities in the planning of new base stations at an early ...

In this paper we assess the benefits of adopting renewable energy resources to make telecommunications network greener and cost-efficient, ...

The Titlis resort area in Switzerland has big plans, including a new, larger mountaintop station, a repurposed telecommunications tower with new levels for public use, and a second cable car.

As part of the contemplated transaction, Salt and Cellnex will be entering into a long term service contract regarding the provision of hosting services over mobile telecom infrastructure as well as the ...

In this paper we assess the benefits of adopting renewable energy resources to make telecommunications network greener and cost-efficient, tackling "3E" combination-energy security, ...

In 2022, Switzerland experienced a 27% increase in telecommunications surveillance, mainly for serious crime investigations. This rise was driven by an increased number of mobile phone antenna searches.

Explore how 5G base stations are built--from site planning and cabinet installation to power systems and cooling solutions. Learn the essential components, technologies, and challenges ...

A slightly older post on LinkedIn detailed the Telecom Site Installation process. Taking the post, the comments, some help from ChatGPT, here is a detailed process of planning, constructing, and ...

End-to-end solutions for the construction of 5G radio sites that are both future-proof and cost-effective for mobile networks that will operate profitably. We help service providers maintain cutting-edge ...
