Market forces are bringing new electricity storage technologies to market, and those technologies are making the grid more reliable and preventing costly price spikes. The best example ...

Texas' strained power grid is set to receive a major boost as Lydian Energy announced it has secured \$233 million in financing for three large-scale battery storage projects. The Washington, ...

Texas has rapidly expanded its energy storage capacity, setting new records and positioning itself as a leader in the transition to a more efficient, cost-effective, and resilient power grid.

Lydian Energy, based in Washington, D.C., is an independent power producer specializing in the development, construction, and operation of utility-scale solar and battery energy storage...

Fast permitting processes and a vast amount of land -- mainstays of Texas' low regulation, business-friendly environment and the same features that have allowed wind and solar power to thrive in ...

Lydian Energy, a Washington, DC-based solar and battery storage developer backed by Excelsior Energy Capital, expects to bring online three two-hour battery energy storage system (BESS) ...

The growth of hybrid energy systems that combine storage technologies with wind and solar generation assets is expected to continue gaining traction in Texas. Incorporating energy ...

A Washington, D.C.-based power producer announced it received financing that will boost three major battery storage projects in Texas.

Texas is expected to continue adding large amounts of energy storage capacity to its grid, with nearly 4.5 GW currently under construction and an additional 7.3 GW in the pipeline.

The 200 MW/400 MWh systems represent a combined investment of about \$139 million, according to Lydian,
