What determinants of household energy choices in Timor-Leste?

Using data from the 2007 Timor-Leste Living Standards Survey, this paper examines the determinants of household energy choices in Timor-Leste. The majority of households are dependent on dirty fuels such as fuelwood and kerosene for energy. Only a small fraction of households use clean energy such as electricity.

How much energy does East Timor use?

East Timor has one of the lowest levels of energy consumption per capita in the world, ranking 193rd as of 2008. In 2022, its electricity consumption was 414.76 million kilowatt-hours. Imported fossil fuels are the primary source of energy for the country, but access to this energy is highly uneven.

What is rural energy policy in Timor-Leste?

A key objective is to ensure that the implementation of the government's rural energy programs provides equitable distribution of benefits. In Timor-Leste the Secretary of State for Energy Policy is responsible for the design and implementation of the government's rural energy program.

Do Timor-Leste households use electricity?

This study uses data from the TLSLS 2007 to analyze household energy choices and dependency. In Timor-Leste, a significant proportion of the population use kerosene and fuelwood, while a smaller number of households use electricity. We found that only about 23% of total sampled households use electricity.
