Will Europe achieve record solar power generation in 2025?

Europe is on track to achieve record solar power generation in 2025, with significant increases in solar energy's share of the electricity mix across multiple countries.

What is Solarpower Europe?

SolarPower ... SolarPower Europe is the award-winning link between policymakers and the solar PV value chain. Get to know the SolarPower Europe team working to transform the European energy system. Get to know everything about solar power. Interested in joining SolarPower Europe? Become a member! Are you looking for webinars? Look no further.

Why is Europe getting more solar power?

The rise in solar power is part of Europe's broader strategy to reduce reliance on fossil fuels and shift towards clean energy, which accounted for a record 61.3% of the continent's electricity last year.

Is Europe becoming a solar powerhouse?

Wind power also reached new highs in May and June, while the surge in solar generation helped the EU cope with soaring energy demand during early summer heatwaves. "Europe is becoming a solar powerhouse," said Ember energy analyst Chris Rosslowe.

Comprehensive news coverage of renewable energy projects, investments, and policies across Europe. Track the latest in solar PV, onshore and offshore wind, hydrogen, energy storage, ...

Solar energy is advancing strongly across Europe thanks to falling costs and its growing role in electricity generation. In 2025 it exceeded capacity targets and became the main source of ...

Wind and solar generated more EU electricity than fossil fuels for the first time in 2025, driven by a massive surge in solar power.

In a historic milestone for clean energy, solar power became the leading source of electricity in the EU for the first time in June 2025. New data from energy think tank Ember reveals ...

The latest report from Ember shows solar and wind outperformed fossil fuel generation in the EU in 2025 for the first time ever.

Get the latest on solar power in Europe: news, projects, and policies driving solar energy growth across the continent, brought to you by Energy Voice.

About The European Electricity Review analyses full-year electricity generation and demand data for 2024 in all EU-27 countries to understand the region's progress in transitioning from ...

Europe is on track to achieve record solar power generation in 2025, with significant increases in solar energy's share of the electricity mix across multiple countries.

Europe is on track to surpass its previous solar power output records this year, with the first quarter (Q1) showing a 32% increase in solar electricity generation compared to the same period ...
