Investments in solar photovoltaic energy have grown during the last years and the technology stands out as the most heavily funded renewable energy source. Find up-to-date ...

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...

mp, Cody Warner, Anjali Katta, and Dana Robson Berkeley Lab's annual Utility-Scale Solar report presents trends in deployment, technology, capital expenditures (CapEx), operating expenses ...

In 2023, approximately 45% of battery capacity and 26% of utility-scale PV capacity were hybrid PV/BESS projects--relatively consistent with previous years. The third-party ownership share of U.S. ...

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Global annual investment in solar PV and other generation technologies, 2021-2024 - Chart and data by the International Energy Agency.

Renewable energy sources accounted for 188.4 GW of the total 263.9 GW net installed electricity generation capacity in Germany in 2024, resulting in a RE share of 71.4% of total capacity.

This statistical publication presents renewable energy statistics for the last decade (2013-2023).

Solar PV systems installed in 2020 and 2021 are eligible to receive a 26% tax credit, but systems installed in 2022 through 2032 are eligible for a 30% ITC. This percentage will decline again ...
