The 40 megawatt (MW) Brewster wind farm near Beaufort in western Victoria, and the 400MW/1800MWh Baranduda battery energy storage system (BESS) near Wodonga in the east, can ...

Victoria has fast-tracked more than \$9 billion worth of renewable projects in under two years, using sweeping powers available to the planning minister to bypass objections and speed up ...

While the Plan for Victoria's Electricity Future and 2024 ISP slightly differ in their renewable generation targets, they both outline extremely ambitious and demanding increases in ...

German renewable energy company BayWa r.e. AG has received approval from the Victorian government to construct a 312-MW wind farm accompanied by a battery storage system in ...

The government of Victoria has awarded fast-tracked approvals for two new battery energy storage system (BESS) projects with a combined capacity of 700 MW, it said on Monday.

Victoria's legislated energy storage targets are: at least 6.3 GW by 2035. The energy storage targets will include short, medium and long duration energy storage systems, allowing ...

China's Trina Solar has received the green light to build a 500MW/1,000MWh battery energy storage system (BESS) in Victoria, Australia.

The Ballarat Energy Storage System provides back-up power and grid stabilisation, vital to maintaining a reliable and affordable energy supply in Western Victoria.

During peak daylight hours, solar panels and wind farms generate substantial energy, often exceeding real-time consumption. The Megapack system offers a strategic solution by storing ...

Victoria says it is back on track for its renewables and storage targets after a rebound in wind and solar
