The security of publicly traded U.S. solar companies is in focus as Chinese communication devices were found in critical renewable energy infrastructure, particularly power ...

Among the six companies targeted: CATL, BYD, Envision Energy, and Gotion High-tech. Utilities are already bracing for a broader crackdown. Some, like Florida Power & Light Company, are reportedly...

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on anonymous ...

In November, a commercial dispute between two inverter suppliers - Sol-Ark and Deye - led to solar power inverters in the U.S. and elsewhere being disabled from China, highlighting the risk...

"If you remotely control a large enough number of home solar inverters, and do something nefarious at once, that could have catastrophic implications to the grid for a prolonged period of time," said Uri ...

Some utilities, including Florida's largest power supplier Florida Power & Light Company, are attempting to minimise the use of Chinese inverters by sourcing equipment from elsewhere, ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said. ...
