Who makes wind turbines?

German firms such as ENERCON and Nordex, as well as China's Mingyang Smart Energy and Envision Energy, are also key players shaping the future of wind power. This ranking highlights the top 15 makers of wind turbines worldwide, according to their installed capacity as of October 2025. 1.

Which wind turbine manufacturers dominate the world?

As the world accelerates its shift toward clean energy, the competition among wind turbine manufacturers is at an all-time high. Leading wind power turbine manufacturers like Vestas (Denmark), Siemens Gamesa (Spain), Goldwind (China), and GE Vernova (France) continue to dominate global markets with massive installed bases and expanding order books.

Are wind turbine manufacturers ready for production?

Manufacturers are getting ready for production. This trend may not be a good one for the future production of wind turbines. Figure 10. Manufacturers AV, NA, and UD kW, 6001-8000 kW, 8001-10000 kW, and 10001-12000 kW. available (AV), not available (NA), and underdeveloped (UD). power range are available compared to the other power ranges.

How to develop wind turbine manufacturing in China?

The bidding system is the key to the development direction of wind turbine manufacturing. In China, without much technology difference among domestic manufacturers, price plays the most important role (Table 9). Innovation capability, experience and maintenance service are largely neglected in the evaluation process.

This chapter comprehensively discusses wind power generation, tracing its evolution from historical windmills to modern large-scale wind farms, and analyzing its technical principles, resource ...

This report provides a comprehensive analysis of the global wind turbine manufacturing industry. It examines current market dynamics, details the primary components of modern wind ...

The Wind Turbine Generator Market is expected to reach USD 21.21 billion in 2025 and grow at a CAGR of 9.27% to reach USD 33.04 billion by 2030. Goldwind, Envision Energy, Ming ...

This study focuses on providing manufacturing companies with the latest developments and most efficient manufacturing processes to improve wind turbine outcomes.

The development of wind turbine technology has been studied globally and has shown that energy production from wind has become one of the most balanced, advanced, and promising ways for the ...

Domestic wind turbine manufacturing sector in China has experienced development stages starting from scratch to mass production. During the 11th FYP period (2006-2010), the main ...

The wind turbine market size exceeded USD 170.9 billion in 2025 and is estimated to grow at a CAGR of 7.3% from 2026 to 2034, driven by rising renewable energy adoption and expanding offshore wind ...

Check out our blog for the best wind turbine manufacturers, including the largest OEMs in the wind industry and leading wind power generation companies.

Executive Summary: Which are the Top 10 Wind Turbine Manufacturing Companies to Watch? Bonvan (France): Portable wind turbine kits with retractable telescopic masts for domestic ...
