This autumn, we added to that legacy with the delivery of Ireland's newest wind farm, Yellow River in Offaly, producing vital renewable energy from the Midlands. But we can't stop there.

Wind farm design, planning and environmental specialists will help prepare a planning application for large wind turbines. Details of these can be found on the IWEA website. SEAI has published guides ...

As of 2021, the island of Ireland had 5,585 MW of installed wind power capacity, with 4,309 MW in the Republic of Ireland.

Authors: Forest Mak, John McCann, and Shane Húilín, Sustainable Energy Authority of Ireland (SEAI). 2024 marked continued growth in installed wind capacity, with 228.6MW of new onshore ...

New figures published today show that Irish wind farms provided a third of the island of Ireland's electricity in 2025.

In Q2 2023, a new rotor size record for a wind turbine installed onshore in the Republic of Ireland was set. A 149 m rotor installed at Arderroo Wind Farm [8], commenced electricity export to the Irish grid ...

Onshore wind capacity exceeds 5,000MW, driving Ireland's transition to an energy independent electrostate powered by clean, affordable, Irish energy. Irish wind farms provided a third ...

Located in Rhode, County Offaly, the 101MW wind farm comprises 29 turbines and has officially entered full commercial operation, making it Ireland's newest onshore wind farm.

Oweninny Wind Farm is the largest onshore wind farm in Ireland with an overall installed capacity of 192MW. This is enough to generate a volume of electricity equivalent to the average annual electrical ...

Wind turbines at a power station in ireland

Ireland's first 20MW/four hour battery, co-located with the new 55.8MW Cushaling wind farm, has been brought into service. Cushaling has Ireland's tallest wind turbines, at 6.2MW and 185m and it is ...
